PROFESSIONAL SUMMARY

MBA (Business Analytics) candidate with a strong foundation in Mathematics, proficient in Python, R, SQL, Excel, Tableau, and Power BI. Adept at analytical problem-solving and data-driven decision-making to generate actionable business insights, optimize business performance, and support strategic growth initiatives.

TECHNICAL SKILLS

Programming & Querying: Python, R, SQL (Microsoft T-SQL)

Data Visualization: Power BI, Tableau, Advanced MS Excel

Gen AI & Automation: ChatGPT, Gemini, Microsoft Copilot, Google NotebookLM

Business Analysis: Requirement Gathering, KPI Tracking, Business Process Mapping, Proposal Development, Strategic Insights, Dashboarding

Research & Analysis: Company Profiling, Industry Research, Consumer Insights, Secondary Research

Design & Communication: Canva, Infographics, PowerPoint, Storytelling with Data, Communication, Problem Solving

PROJECTS

Loan Default Prediction Dashboard | Power BI

Oct 2025 – Nov 2025

- Analyzed 148,671+ loan records to identify approval patterns, default risk, and borrower behavior, enabling data-driven credit decision-making.
- Built an interactive Power BI dashboard with 10+ KPIs and DAX measures, improving risk visibility and reducing manual reporting effort by 40%.
- Performed data cleaning (null handling, feature selection, transformation), improving dataset reliability and analytical accuracy by 30%.
- Identified high-risk segments (loan purpose p4, North/South regions), delivering insights that can potentially reduce loan defaults by 20–25% through targeted policy improvements.

Customer Churn Prediction & RFM Segmentation using Machine Learning | Python

Jan 2026 – Feb 2026

- Examined 1M+ retail transactions to uncover revenue concentration; top 10% of customers contributed a disproportionate share of total revenue, informing high-value retention strategy.
- Built RFM-based segmentation model classifying customers into 5 actionable segments: Champions, Loyal, At-Risk, Lost, and New — enabling targeted lifecycle marketing interventions.
- Developed and evaluated Logistic Regression and Random Forest models; recommended Random Forest for deployment based on superior F1-score and ROC-AUC performance.
- Engineered customer-level features (Recency, Frequency, Monetary, AOV, purchase intervals, return rate) to improve churn prediction accuracy and support data-driven decision-making.

EDUCATION

Master of Business Administration — Business Analytics

2025 – 2027 (Pursuing)

Jaipuria Institute of Management, Ghaziabad | Dr. A.P.J. Abdul Kalam Technical University, Lucknow

Bachelor of Science — Mathematics

2021 – 2024

Om Degree College, Shikohabad | Dr. Bhimrao Ambedkar University, Agra | CGPA: 7.56 / 10

CERTIFICATIONS

- Power BI Data Modeling with DAX from LinkedIn Learning (Nov 2025)
- Excel Essential Training (Microsoft 365) from LinkedIn Learning (Nov 2025)
- Master Microsoft Excel from LinkedIn Learning (Mar 2026)
- Data Analytics with Python from NPTEL (Jan to Apr 2026)
- Business Intelligence & Analytics from NPTEL (Jan to Apr 2026)
- Data Analytics Job Simulation - Deloitte Australia / Forage (Apr 2026)

CO-CURRICULAR ACTIVITIES

Jaipuria Institute of Management, Ghaziabad (2025–26)

- Attended the 11th Corporate Summit 2025 (February 28, 2026)
- Core team member, IT Club, Jaipuria Institute of Management
- Tech-Driven Problem Solving – Tech Quest competition
- Qualified in NISM Quiz – College Round and Online Round
- Participated in Google Gemini AI Tools Training Workshop
- Participated in Cricket competitions during Sports Day
